PRACTICE PROGRAMS

1.Student:

Q1 Student :

10 marks

Write a program to enter the mark of a student in four subjects. Then calculate the total and aggregate. Display the grade obtained by the student, if student scores an aggregate greater than 75% then grade is distinction

Your Code

```
1 public class grade{
2     public static void main(String[] args){
3         int m1=80;
4         int m2=75;
5         int m3=90;
6         int m4=85;
7         int total=m1+m2+m3+m4;
8         double average=total/4.0;
9         System.out.println("total="+total);
10        System.out.println("Average="+average);
11        if (average>75)
12            System.out.println("grade=distinction");
13        else
14            System.out.println("grade=no distinction");
15    }
16 }
```

Run

Save

Input

stdin input

Output

```
total=330
Average=82.5
grade=distinction
```

2.ATM:

Q2 Atm

10 marks

write a program to print the total amount available in the atm machine with the conditions applied total denominations are 2000, 500, 200,100, get the denomination priority from the user and the total number of notes from the user to display the total available balance to the user

Your Code

```
1 public class ATM{
2     public static void main(String[] args){
3         int denomination=500;
4         int notes=20;
5         int total=denomination*notes;
6         System.out.println("denomination="+denomination);
7         System.out.println("number of notes="+notes);
8         System.out.println("total balance=Rs."+total);
9     }
10 }
```

Run

Save

Input

stdin input

Output

```
denomination=500
number of notes=20
total balance=Rs.10000
```

3.Tax:

Q3 Tax

10 marks

Write a program to calculate tax given following condition :

If income is less than or equal to 150000 then to tax

If taxable income is 150001 – 300000 the charge 10% tax

If taxable income is 300001 – 500000 the charge 20% tax

If taxable income is above 500001 the charge 30% tax

Your Code

```
1 public class tax{
2     public static void main(String[] args){
3         int income=350000;
4         double tax;
5         if (income<=150000)
6             tax=0;
7         else if(income<=300000)
8             tax=income*0.10;
9         else if(income<=500000)
10            tax=income*0.20;
11        else
12            tax=income*0.30;
13        System.out.println("income="+income);
14        System.out.println("tax="+tax);
15    }
16 }
```

Input

stdin input

Output

```
income=350000
tax=70000.0
```
